OPIS Global Marine Fuels

Key Marine Fuel Prices, News & Commentary for Asia, Europe and the Americas

01 October 2020

ASIA

- PTT Global Chemical sells VLSFO on a delivery ex-ship basis
- Hindustan Petroleum awards LVFO tender to a trader
- Fuel oil inventory level in Singapore climbs to a six-week high

EUROPE

- Tight VLSFO availability at bunker ports in Rotterdam and Gibraltar
- VLSFO East/West spread narrows by \$2.98/mt to \$17.62/mt
- Shell expects refining margins to be significatnly lower in Q3

AMERICAS

- Panama VLSFO bunkers done between \$303-309 per metric ton ex-wharf
- VLSFO in New Orleans confirmed stemmed at \$305/mtw for 300 metric tons
- Bulk VLSFO trades in Gulf Coast at \$293.50/mt FOB

ASIA

PTTGC sells end Oct-loading VLSFO

PTT Global Chemical (PTTGC) awarded a tender to export 35,000mt minimum 100 CST very low sulfur oil (VLSFO) from Map Ta Phut. The tender closed on Sept 21 with loading from Oct 29-31. The tender was awarded on a delivered ex-ship (DES) basis to Singapore at around \$4.20/mt premium to Singapore marine fuel 0.5% assessment, said traders.

The latest sale was less than PTTGC's typical export volume of around 60,000mt of VLSFO per month.

In India, Hindustan Petroleum Corporation (HPCL) sold 24,000mt of maximum 125 CST low viscosity fuel oil (LVFO) of 3.5% sulfur from its Mumbai refinery via a tender possibly to Trafigura. The tender closed on Sept 29. The LVFO cargo is scheduled to load from Jawahar Dweep, Mumbai over Oct 14-16.

Philippine refiner, Petron possibly cancelled a tender to export 80,000mt 180 CST 3.5% high sulfur fuel oil (HSFO) from Bataan over Sept 27-29, said market participants

Fuel oil stocks in Singapore climbed 414,000 bbls to a 6-week high of 24.047 million bbls for the week to Sept 30.

EUROPE

Bunker VLSFO tight in Rotterdam and Gibraltar

Availability of VLSFO at bunker ports in Rotterdam and Gibraltar is tight, a broker reported on Thursday.

Bunker VLSFO barges changed hands at \$314.50/mt in Rotterdam, only \$5/mt lower than Gibraltar where it was sold at \$319.50/mt, broker data showed.

"My take is that bunkering demand is gradually picking up while the start of turnaround season and refinery run cuts may have dented supply, tightening the market and supporting the VLSFO price," said Hedi Grati, head of European/CIS refining research at IHS Markit.

The very low sulfur fuel oil (VLSFO) East/West swaps spread between Singapore and northwest Europe narrowed on Thursday.

The spread between Rotterdam and Singapore VLSFO paper September contract narrowed to \$17.62/mt on Thursday down \$2.98/mt to \$20.60/mt on Wednesday, OPIS pricing data shows.

The VLSFO front-month swap in Singapore was at \$302.25/mt and the VLSFO front-month for Rotterdam was at \$284.63/mt, broker data reported.

In refinery news, Royal Dutch Shell said it now expects refining margins to be significantly lower in Q3 2020 compared with Q2 2020.

In addition, trading and optimization results are expected to be lower than the historical average and significantly lower than Q2 2020, while marketing margins are expected to be significantly higher compared with the second quarter 2020.

The company expects Q3 2020 refinery utilization to be between 64% and 68%, and product sales volumes between 4 million and 5 million b/d.

In late July, Shell said in its Q2 2020 earnings announcement that it had expected refinery utilization of 68%-76% and product sales volumes of 4 million-5 million b/d.

AMERICAS

Most marine fuels fall on weak demand, faltering wider complex

Most marine fuels closed the day lower, although values did strengthen from early in the day. December ICE Brent settled at \$40.93/bbl, down \$1.37/bbl, whereas at midday its level was down by \$2.12/bbl at \$40/12/bbl. One Houston supplier noted he "did not see anything move all day."

In the Gulf Coast, Houston VLSFO was heard in a wide range from the \$290s per metric ton ex-wharf to \$310/mtw, while marine gasoil was heard on offer at \$350/mtw by several suppliers. VLSFO was assessed \$4/mt lower to \$289-293/mtw, and MGO was marked \$5/mt weaker to \$330-340/mtw. HSFO was indicated at \$235/mtw and assessed \$6/mt lower to \$232-236/mtw.

New Orleans was heard tight on HSFO and one stem was confirmed at \$285/mtw for 1,500mt. NOLA HSFO was marked \$17/mt higher on the stem to \$281-285/mtw. That surge may be short-lived when HSFO resupply comes to the port. VLSFO was done at \$305/mtw for 300mt and the fuel was assessed unchanged at \$301-305/mtw. MGO was assessed \$2.50/mt higher to \$350-355/mtw.

New York Harbor was all indication as little was heard in spot business. Seemingly tracking lower with the wider petroleum complex, all fuels were off by \$4-5/mtw. VLSFO and HSFO were assessed \$4/mt weaker to \$317-321/mtw and \$258-262/mtw, respectively. MGO was marked \$5/mt lower to \$340-350/mtw.

In Panama, 800 metric tons of VLSFO for October 11 delivery was heard done below \$309/mtw, and a smaller 200 mt parcel was done at \$303/mtw. Panama VLSFO was assessed \$2/mt higher at \$303-307/mtw. MGO was said to be done at \$358/mtw and assessed \$3/mt higher.

Bulk VLSFO Trades in GC at \$293.50/mt FOB

Residual fuel oil markets saw light trading Thursday as prices came off with crude markets. On the Gulf Coast, one deal was heard done in the market for VLSFO, changing hands at \$293.50/mt for a delivery date of Oct 7-9. OPIS used the deal as the assessment, which put it down \$6.50/mt on the day. Using a 19 API, the level equates to December ICE Brent plus \$2.86/bbl, or \$43.79/bbl. Gulf Coast HSFO moved in tandem with swaps, dropping down \$1.25 to \$35.30/bbl.

On the East Coast, no trading was confirmed. VLSFO decreased \$5.75/mt to \$312/mt. Using a 19 API, the level equates to December ICE Brent plus \$5.62/bbl, or \$46.55/bbl. USAC 0.3%S went down with swaps, decreasing \$1.25 to \$36.25/bbl, while 1%S also was clipped \$1.25 to \$41.15/bbl. The 0.3%S product peeled back 80cts/bbl to \$50.50/bbl.

Cargo Update

ASIA

• The *Erik Spirit* is scheduled to load 80,000-mt HSFO from Kiire, Japan to north China over Oct 8

EUROPE

• Glencore has chartered *Cielo Di Ulsan* to move a 28,000-mt fuel oil cargo from St Petersburg arriving in Skagen, Denmark by October 4

AMERICAS

• The P66-chartered *Confidence* tanker on Wednesday set sail for New York from Sillamae with a 18,800-mt vacuum gasoil cargo

US Fuel Oil Imports Down 24.2% in July; Mexico Largest Supplier

Total U.S. imports of residual fuel oil during July were down 24.2% compared with those of June, but up close to 23.6% compared with July 2019, as domestic residual fuel oil demand and stock levels were healthy at the start of summer, according to the latest company-specific information released by the U.S. Energy Information Administration this week.

Total imports of residual fuel oil by individual companies during July came in at about 5.1 million bbl.

In its report for of July, the American Petroleum Institute (API) noted that overall U.S. residual fuel oil consumption increased during that month as industrial and marine activities resumed after being weakened earlier in the year because of the COVID-19 pandemic. API also noted that July represented the first year-on-year increase for residual fuel oil deliveries since October 2019.

Domestic demand, as measured by U.S. product supplied, averaged around 356,000 b/d during July, which was the highest monthly average so far this year, according to EIA data. Also, in late June, residual fuel oil stock levels hit 42.1 million bbl, the highest level since December 2016.

The U.S. imported the most residual fuel oil from Mexico at a total of 1.377 million bbl, EIA data showed. The breakdown of that product included 1.116 million bbl of residual fuel oil greater than 1% sulfur and 261,000 bbl of residual fuel oil that was less than 0.3%S. The lower-sulfur product was solely imported by Valero, the data showed.

Canada was the second-largest originator of U.S. imported residual fuel oil, at 989,000 bbl.

Saudi Arabia came in third, at about 656,000 bbl of residual fuel oil. Saudi Arabia-origin residual fuel oil has been sporadic in recent years as the EIA data show that the U.S. had not imported the product since February 2019.

Freepoint Commodities remained the top importer of residual fuel oil in the U.S., bringing in 1.23 million bbl, with the majority of product going to Puerto Rico to fulfill a power-generation contract.

Motiva was the second-largest importer of residual fuel oil, bringing in 700,000 bbl.

The third-largest was Chevron, which imported about 653,000 bbl of residual fuel oil that had a sulfur level greater than 1%, and all came from Saudi Arabia, the data showed. The cargoes were split between Chevron's Mobile, Alabama, and Pascagoula, Mississippi, facilities.

The U.S. saw imports of residual fuel oil greater than 1%S increase during July compared with the previous month and July 2019. The total residual fuel oil greater than 1%S was close to 3.5 million bbl, compared with 2.3 million in June and 2.13 million in July 2019. Close to 44%, or 2.21 million bbl, of the total residual fuel oil imported during July was 3%S or higher.

Further, imports of total residual fuel oil with sulfur levels between 0.31%S and 1%S totaled 1.32 million bbl, compared with 4.09 million in June and 1.34 million in July 2019. --Reporting by Eric Wieser, <u>eric.wieser@ihsmarkit.com</u>; Editing by Tom Sosnowski, <u>thomas.sosnowski@ihsmarkit.com</u>
