

# 2023 LRVP Season

# OPIS

A DOW JONES COMPANY

To help control ozone levels, virtually every U.S. city switches to 9.0-lb RVP gasoline in the summer, unless a lower level is required under a federal RFG mandate, a state opt-in rule or a voluntary effort by refiners. OPIS displays 9.0-lb. RVP and lower in conventional gasoline racks.

## Low RVP displayed in OPIS rack reports

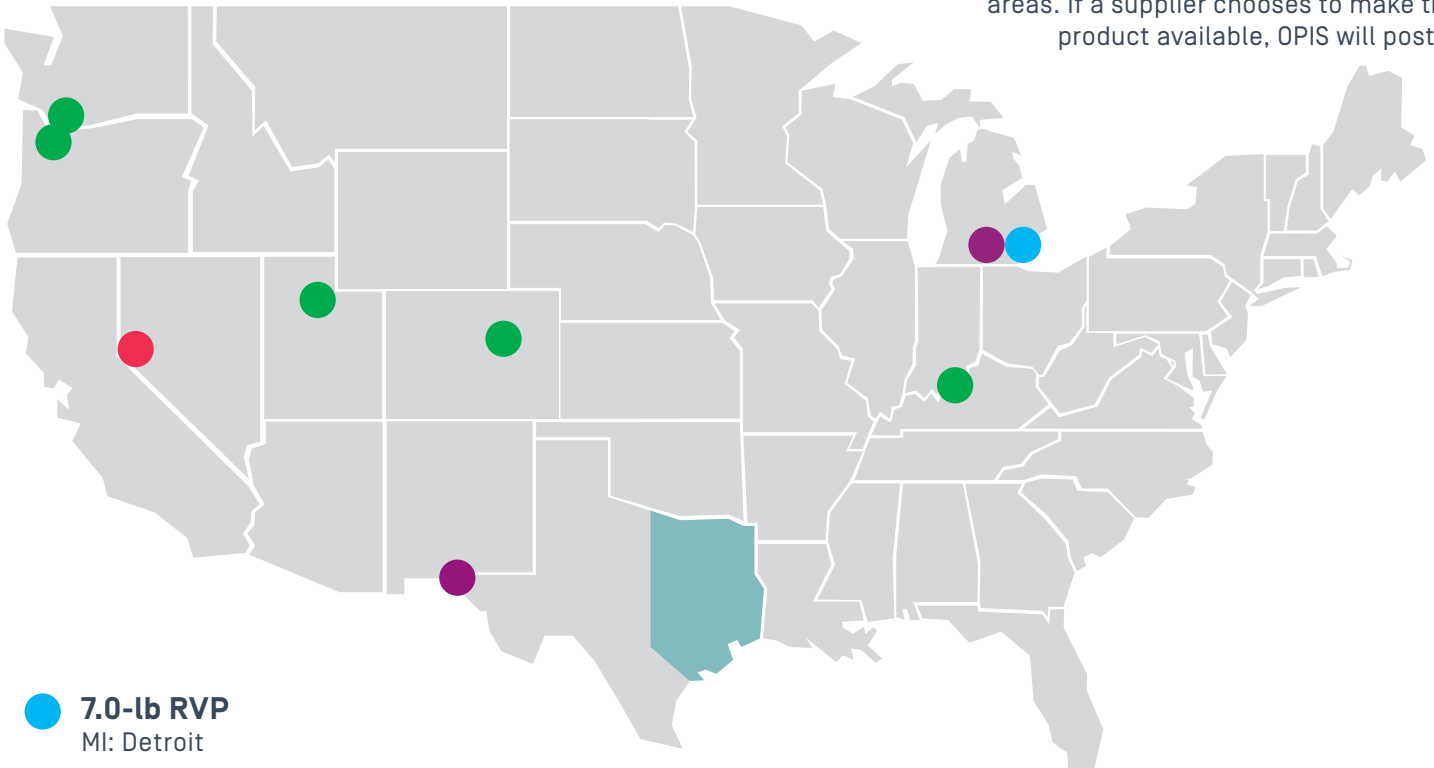

### Reformulated Gasoline [RFG]

If a city is part of the federal RFG program, our reports won't specify the RVP. Phoenix, AZ & California are primarily RFG markets, coded CBG [Clean Burning Gasoline] or CaRFG [California RFG] due to geographical requirements.

## OPIS U.S. RVP Designations

Additional RVP levels may appear in markets where they are not required if such fuel is available for sale outside mandated areas. If a supplier chooses to make this product available, OPIS will post it.

**7.0-lb RVP**  
MI: Detroit

**7.8-lb RVP**  
NV: Sparks/Reno

**7.0-lb & 9.0-lb RVP**
